 TRY IT

Introduction

This is a build update to version 18. It contains bug fixes and enhancements. For perpetual licensed users, a new license key is not needed.

New features and enhancements

- ✓ Improved screen capture for devices based on Android 10.

Bugs fixed

- ✓ Fixed shutdown / reboot functionality issue for devices based on Android 8 and above (devices that uses an add-on with permission for such).
- ✓ Problem solved with mouse input not executed precisely enough on certain devices, when using the high-density mode. Problem for example seen on LG v40, Android 9 device.
