

SERVICE COMPANIES

Do you know how effective your fleet is?

How many of your vehicles are actually making a profit for you right now? These are just a couple of the questions that Trackunit provides the answers for.

The Trackunit Fleet Management System gives you a complete overview of your fleet, improves your planning and logistics, keeps you updated on service and maintenance requirements and provides vehicle mileage documentation.

Trackunit also keeps track of working hours down to the minute and is an important tool when it comes to billing your customers accurately.

Trackunit provides you with the answers:

-  How many of your cars are standing idle and how many are in operation right now?
-  Do you have the right vehicles and employees to meet customer and job requirements?
-  Are your invoices accurate down to the hour?
-  Do you have a service and maintenance plan - and do you follow it?
-  Do you know where all your cars are right now?
-  Do you know who is close by when a customer calls with an urgent matter?

Intelligent fleet management

With a variety of innovative features, Trackunit optimizes your fleet management and increases your revenue. The Trackunit reports give you the exact information you need to boost your business and you can access the system through your computer or smartphone 24/7.

The Trackunit Fleet Management System is developed and produced in Denmark.

Thoroughly tested

Today, more than 2,000 companies have installed Trackunit in 50,000 units. Why? Because Trackunit is an investment that brings a return on investment in less than one year. Can you afford to do without it?
